FOR IMMEDIATE RELEASE

EHR Go-Wallcur Integration Partnership Announced

San Diego, California, May 29, 2019 - EHR Go, the premier educational EHR featuring realistic and diverse patient cases, announces a partnership with Wallcur Practi-Meds, the leading innovator for training and simulation in healthcare education.

EHR Go now includes easy medication simulation through the integrated use of Wallcur Practi-Meds. Simulation educators can utilize Wallcur products, which are pre-programmed into EHR Go's eMAR scanning electronic charting system, for a realistic learning experience.

"This will provide a huge benefit for faculty and instructors, making it easier to prepare students for the evolving healthcare industry," said Kathleen Annala, CEO and President of Archetype Innovations, LLC, creators of EHR Go.

EHR Go enables healthcare educators to integrate realistic, story-based learning into inter-professional healthcare curricula, bringing clinical scenarios to life in simulation, skills, and classroom environments. Wallcur Practi-Meds support evidence-based learning through hands-on practice. EHR Go and Wallcur are working together to provide a more streamlined experience within the educational process.

EHR Go is a ready-to-use, web-based educational electronic health record, designed to teach human-centered use of technology in healthcare. For more information, visit ehr.go.com or call 877-742-3926.

Wallcur provides the highest quality training medications and Practi-Products that both stimulate and simulate clinical learning in a safe, non-clinical environment. For more information, visit wallcur.com or call 858-565-4366.
